

EM1500

CM1500 V: the high speed single disc machine suitable for restoration and dry polishing work

CM1500 V is the high speed single disc machine from Comac that's suitable for restoration and dry polishing work. Extremely easy to handle, it is supplied with a vacuum mechanism for collecting dust in the dedicated container compartment.

Equipped with an exceptional balancing system and gas spring on the handle, the CM1500 V is extremely pleasant to use, with no user-fatigue.

The CM1500 V high speed professional single disc machine from Comac is the ideal solution for service and cleaning contractors operating in hotels, convention centers and for use in the HoReCa, health, public, automotive, retail and large-scale retailing sectors.

CM1500 V
Working width: 500 mm
Power supply: cable
Drive: direct

Key elements and best technologies placed at the service of CM 1500 V single disc machine, to guarantee optimal performance:

THE ADVANTAGES OF CM1500 V

- High speed single disc machine recommended for restoration and dry polishing work
- Exceptional balancing system that makes it use extremely pleasant, with no operator fatigue. It also prevents the operator from burning and/or damaging the surface being treated, ensuring results with excellent shine.
- The brush conveys the dirt collected by the vacuum system into a collection bag, preventing the dust produced from being dispersed into the environment. The bag is easy to remove and replace.
- The direct drive requires no maintenance, allowing significant economic savings over time.
- Extremely quiet operation, so it can also be used in environments where discretion and silence are necessary.
- The single disc machine is easy to move thanks to the special transportation wheels.

GAS SPRING

Extremely easy to handle thanks to the gas spring on the handle.

STOP&GO

The system for making cleaning operations more economical, optimizing consumption and reducing emissions.

When the machine is temporarily idle, the solution flow is interrupted. In this way consumptions are optimized and wastes reduced.
